Presenting Problem:

I am referring this patient for an **urgent endocrinology assessment** regarding **severe hypothyroidism in early pregnancy** in the context of a **history of Graves disease**.

Clinical Details:

- Approximately **7 weeks pregnant**.
- Reports **mild vaginal bleeding**.
- Past history of **Graves disease**.
- Recent thyroid function tests show **severe primary hypothyroidism**:
 - **TSH**: 82 → 90 mIU/L
 - **FT4**: 5.6 → 6.3 pmol/L
- **TSI positive** at 2.5 IU/L (ref <0.55).
- Anti-TPO and anti-Tg negative.
- Previously euthyroid earlier this year.
