Re: Paula GRIFFIN, DOB 25/07/1974

Dear Dr Ginges,

Thank you for referring Paula for management of her right shoulder. She has attended six sessions. Active flexion has improved from 110° to 150° and her pain score has reduced from 7/10 to 3/10.

I plan to continue fortnightly sessions for another month focusing on rotator cuff strengthening, then discharge to a home program.

Kind regards,
Tom Ellis, Physiotherapist
