

PRP Diagnostic Imaging

Suite 12, 320 Victoria Avenue, Chatswood NSW 2067

MRI Right Knee

Exam date: 19 April 2026 | Reported: 19 April 2026

PATIENT

Name: Test Patient GAMMA

DOB: 02/02/1978

Address: 44 Synthetic Lane, CHATSWOOD NSW 2067

Medicare: 2199999991/3

REFERRING DOCTOR

Dr Herman Lau

TECHNIQUE

Multiplanar, multisequence imaging of the right knee was performed including PD, PD fat-saturated and T1-weighted sequences.

FINDINGS

There is a horizontal cleavage tear of the posterior horn of the medial meniscus extending to the inferior articular surface. Mild chondral thinning is noted in the medial femoral condyle. The anterior and posterior cruciate ligaments are intact. Collateral ligaments are unremarkable. Small joint effusion. No evidence of acute fracture or bone marrow oedema.

Impression: Horizontal tear of the posterior horn of the medial meniscus with mild medial compartment chondral wear and a small joint effusion.

Reported by Dr Helena Pavlovic, Provider No. 0000003R
