Dear Dr Altie

RE: James [REDACTED] DOB 8/09/1979  
72 Greenfield Dr, [REDACTED] NSW 2573  
Mobile: 0451 223 891 [REDACTED]  
Claim No: 9127834 [REDACTED]

Thank you for your ongoing care [REDACTED] whom I caught up today in rooms for follow-up.

**Provisional Diagnosis:** Six weeks post endoscopic RF neurectomy.

It was a pleasure to catch up with [REDACTED] gain today.

Unfortunately, he still experiences ongoing neck pain and feels the RF may or may not have made a difference.

The wounds have healed up nicely and he feels that he has plateaued in terms of his kyphosis.

I understand at the moment he is still under investigation for a possible ALS variant with Flail Arm under the care of Professor Menon at Concord.

They did want a muscle biopsy which I will be happy to perform at Prince of Wales Private, however, it would be prudent and better for [REDACTED] to perform this rather through Concord Hospital where most of his care is being managed.

He remains on daily Oxycodone and tries not to take more than that and recently unfortunately he has had to close his business and at the moment he is at a bit of a loss what to do next.

We did touch upon once again the surgical option of a multilevel fusion but that is quite extensive and is something I am not keen to rush into neither [REDACTED]

I have suggested that he sort out the ALS side of things and then we will perform an x-ray in three months to see how he is travelling.

Yours Sincerely

**Dr Christopher Huang**

Neurosurgeon
